        <p style="font-size:0.9rem; line-height:1.6; color:#cbd5e1;">
          The <strong>Smart Student Attendance System by Face Scanning</strong> automates university lecture roll calls using computer vision. Traditional manual paper registers take 10–15 minutes of lecture time and suffer from student proxy attendance. This system captures live student face frames, extracts biometric landmark vectors, and matches them strictly against registered student faces.
        </p>
      </div>

      <div class="card">
        <h3 style="color:var(--accent); margin-bottom:10px;">2. Anti-Proxy Security &amp;amp; Features</h3>
